nteli.io

For Salesforce sellers of manufacturing products
Salesforce Premier Partner · Austin, TX

Agentforce Manufacturing and Agentforce Revenue Management for small manufacturers. Three ways to start.

Your prospect builds to order, quotes from spreadsheets, and one or two people know the rules. Nteli sets up the whole Quote-to-Order story: what the account already buys, the RFQ, a configuration that stops what can't be built, a priced quote with a reason on every line, and the order.

Licenses stay yours
Nteli's fees are services only. Every license is sold by you, the Salesforce AE.

Small entry point
A fixed $25K start sits easily beside the license deal.

Built by configurator people
Our team has built product configurators for Cisco, Dell and IBM.

	Quick Start Quoting right, in a week	**Migrate** Their history from day one, not an empty system	**Full Rollout** The whole flow end to end, with Agentforce, team trained
Nteli services	**$25K fixed**	**$40–60K**	**$75–100K**
Live in	1 week, self-serve, once templates are filled	About 3–5 weeks	About 8–12 weeks
Who loads the data	Customer, using Nteli's templates	Nteli	Nteli
Data sources Spreadsheets, an old CPQ, an ERP export	1: Nteli's catalog, price book and agreement templates	Up to 3. About $40K for 1–2 clean sources, up to $60K for 3 or messy ones	Up to 5, plus 1 ERP
WHAT EVERY CUSTOMER GETS			
Foundation functions Sales Agreements and Account Forecast, Opportunity and RFQ, Configure, Check, Price with cost and margin, Quote, Order	✓	✓	✓
Current Sales Agreements loaded	✓ From the template	✓	✓
Branded quote templates	1	3	5
Checks that stop what can't be built	Up to 10	Up to 25	Up to 50, plus routing to engineering review
Approvals	Standard discount approval	Same	Multi-step, by discount and by product
WHAT EACH BAND ADDS			
Data migration Catalog, price books, accounts, open quotes	—	✓	✓
Order history loaded Run-rate and forecast work from day one	—	✓	✓
ERP integration	File export of orders	File export of orders	1 ERP: orders out, status back. Integration license, such as MuleSoft, separate if needed
Agentforce Proposes; your rep approves	—	Forecast briefing, with adjustments the rep approves	Plus RFQ reading, stop explanations, quote and email drafting, order updates, claim summaries
Dashboards	Standard Quote-to-Order dashboard	Plus agreement attainment and forecast accuracy	Plus dashboards on the customer's own measures
Training	Recorded walkthrough	Live session for sales	Admin, sales team, and train-the-trainer
Add-ons	—	—	Pick two: Fulfillment Plan, distributor claim checking, dealer quoting
Support after go-live Then an optional monthly retainer	2 weeks	30 days	60 days
Fits a manufacturer that...	Has its catalog in spreadsheets and wants quotes right now	Has years of quotes and orders it can't lose	Runs orders through an ERP and sells direct and through the channel

The one week in Quick Start

1. **Day 1.** Kickoff, and the filled templates are checked.
2. **Day 2.** Catalog and price book loaded, products configured.
3. **Day 3.** Checks and the discount approval set up.
4. **Day 4.** Branded quote template, current agreements loaded.
5. **Day 5.** Tested on the customer's own recent RFQs, then live.

What moves the price inside a band

- **Migrate:** how many data sources, and how messy.
- **Full Rollout:** $75K assumes a standard ERP integration. A complex ERP or more integration points moves it toward $100K.

Design partners

The first three customers get a reduced price in exchange for being a named reference.

Bring us a prospect.
